SUMMARY

Self-taught UI designer and Python full-stack web developer with a passion for creating visually appealing, user-friendly digital experiences. Knowledgeable in HTML/CSS/JS, and Python frameworks like Django,Figma, Framer, WordPress.Committed to continuous learning and adept at quickly adapting to new technologies.

PROJECT

The GMRL laboratory project - is a web application with an interactive and user-friendly interface built with HTML, CSS,Bootstrap and JavaScript on the front end. On the back end, the project manages the application's logic, database, and server-side operations with Python and the Django framework. The GMRL laboratory project provides a seamless and responsive experience for users to access and interact with laboratory data and functions by combining these technologies.
