SUMMARY

Developer with a strong foundation in both front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, and experienced with Python frameworks like Django. Committed to continuous learning and adept at quickly adapting to new technologies. Passionate about delivering innovative solutions and successfully completing projects. Ready to bring creativity, problem-solving skills, and a collaborative approach to any dynamic team.

PROJECT

The GMRL laboratory project - is a web application with an interactive and user-friendly interface built with HTML, CSS,Bootstrap and JavaScript on the front end. On the back end, the project manages the application's logic, database, and server-side operations with Python and the Django framework. The GMRL laboratory project provides a seamless and responsive experience for users to access and interact with laboratory data and functions by combining these technologies.
https://github.com/Amaljithkaliyodath/GMRL

Weather Application

This application retrieves weather data from the Openweather API and displays information such as city, temperature... HTML, CSS for styling, and Javascript for dynamic functionality. and server-side operations with Python and the Django framework.

TECHNICAL SKILLS

- HTML
- Cascading Style Sheets (CSS)
- Bootstrap (Framework)
- JavaScript
- Python
- Django (Framework)
- SQLite
- Git & GitHub
- Mysql
- RestAPI
- WordPress
- Php
- Laravel
- Java
- **C++**

EDUCATION

Bachelor of Computer science
Kannur University - P.K Kalan Memorial college of Applied science   **2020- 2023**

Higher Secondary
GVHSS Thalapuzha - Computer science   **2018- 2020**

INTERNSHIP&COURSES

Synnefo Solutions - six-month course and one-month internship in full-stack Python Web development During this time, I gained experience working with front-end languages such HTML, CSS, and Bootstrap, as well as backend technologies including Python and Django.
